4 MAIN OUT (UNBALANCED) terminals

- This stereo pair of RCA terminals provides a unbalanced line level output.
- Connect these terminals to the unbalanced analog input terminals on an amplifier or console.

5 REC OUT terminals

- This stereo pair of RCA terminals provides a line level output. The signal is unaffected by the Master Level control.
- It is intended for use with a tape recorder, but is not restricted to that purpose.

6 BOOTH OUT (BALANCED) connectors

- These 1/4" TRS type connectors provide a balanced line level output with independent front panel Zone Level controls and are not affected by the Master Level control.
- Connect these connectors to the balanced analog input connectors on an amplifier or console.
- Pin layout: Tip: Hot, Ring: Cold, Sleeve: GND
- Applicable connector: Cannon XLR-3-31 or equivalent.

7 SEND/RETURN terminals

- These 1/4" TS mono terminals allow external processing of the program signal.
- When connect monaural type effect processor, use Lch input and output.

8 LINE 2, 4, 6, 8 FADER output terminals

Connect these terminals to the Fader input terminals of the DN-S1200, DN-S3500, DN-HS5500 and etc using the 3.5 mm stereo mini cord.

9 DUCKING ATTENUATION LEVEL control

DUCKING attenuation level can be adjusted. (-∞ ~ -20 dB)

10 AUX MIC input terminal

Accepts a balanced microphone with 1/4" terminals.

11 MAIN MIC input terminal

- Neutric combo terminal.
- Accepts either a balanced microphone with an XLR connector or a balanced microphone with 1/4" TRS balanced terminals.

12 PHONO 1, 2, 3 /LINE 1, 3, 5 switches

- These switches change the Input from Phono to Line level inputs.
- These switches set Line level inputs when Turntable is not connected.

13 PHONO 1, 2, 3 /LINE 1, 2, 3, 4, 5, 6, 7, 8 input terminals

These stereo pairs of unbalanced RCA terminals are Inputs for any line level device.

14 Phono Ground screws

This screws provide a place to connect the ground wire from a turntable. This terminal is exclusively for a turntable grounding and not a safety earth ground.

Connections

Refer to the Connection Diagram below.

1. Make certain AC power is off while making connections.
2. Quality cables make a big difference in fidelity and punch. Use high-quality, audio cables.
3. Do not use excessively long cables. Be sure plugs and terminals are securely fastened. Loose connections cause hum, noise, or intermittence that could damage your speakers.
4. Connect all stereo input sources. Then connect any effects into the stereo Effect, if used. Connect your Microphone(s) and monitor headphones. Make sure all faders are at "zero" and the unit is off. Take care to connect only one cable at a time. pay attention to L and R position of terminals, on both the DN-X1100 and outboard gear.
5. Connect the stereo outputs to the power amplifier(s) and/or tape deck(s) and/or MD recorder(s) and/or CD recorder(s).

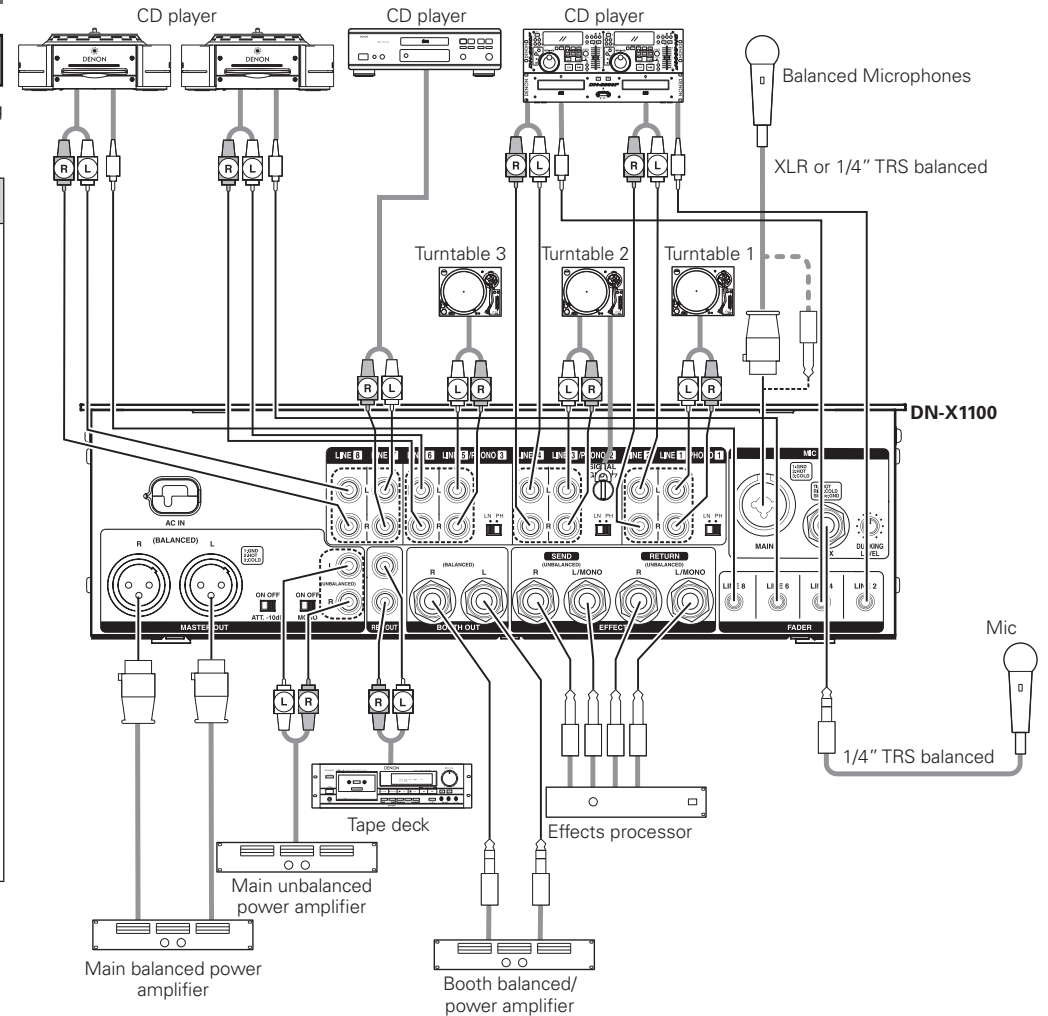

NOTE

- Always switch on your audio input sources such as CD players first, then your mixer, and finally any amplifiers.
- When turning off, always reverse this operation by turning off amplifiers, then your mixer, and then input units.

Preparations

Cables Used for Connections

Select the cables according to the equipment being connected.

NOTE

Keep volume at comfortable sound levels and avoid extended play at very high volume as it may cause temporary or permanent hearing loss.

Fader Start

Connections

If the separately sold DN-S3500 and etc. players are connected to LINE2, 4, 6 or 8, they can be started using the source input fader (Ch. Fader) or Crossfader, as long as the 3.5 mm stereo mini cords have been connected.

Channel Fader Start

- 1** Turn the **INPUT ASSIGN** switch to select the desired source from LINE2, 4, 6 or 8.
- 2** Turn on the **CH FADER START** switch.
※ **CROSS FADER ASSIGN** position is "THUR".
- 3** Move the source input fader (**Ch. Fader**) of CH-1, CH-2, CH-3 or CH-4 control all the way to the bottom.
- 4** Set the standby mode on CD player.
- 5** Use the **CH FADER CONTOUR** control to control the channel fader startup curve.
- 6** When you want to start the player, move up the source input fader (**Ch. Fader**) and the CD player will begin playing.

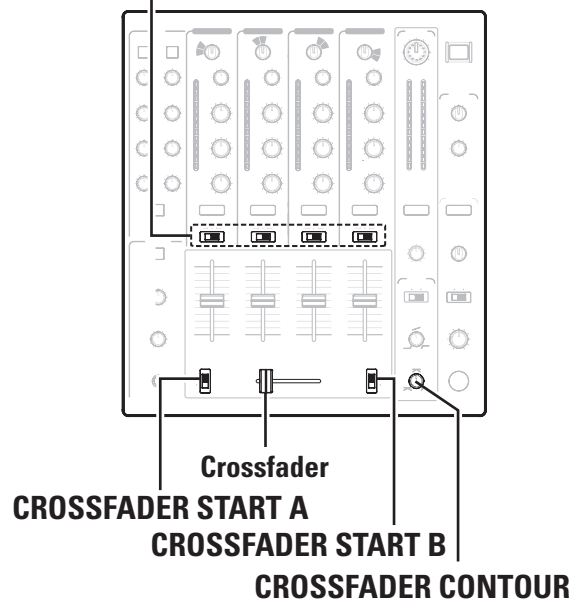

Source input fader (Ch. Fader) CH FADER CONTOUR

Crossfader Start

- 1** Turn the **INPUT ASSIGN** switch to select the desired source from LINE2, 4, 6 or 8.
- 2** Using the **CROSSFADER ASSIGN** switch, assign the channel or Sampler source into A or B of Crossfader.
- 3** Turn on the **CROSSFADER START A, B** switches.
- 4** Slide the **Crossfader** all the way in direction opposite the source you want to start. (In the following example, startup is done with the CD player connected set to Assign A.)
- 5** Set the standby mode on CD player.
- 6** Use the **CROSSFADER CONTOUR** control to control the cross fader startup curve.
- 7** When the **Crossfader** is slid in the opposite direction, CD player play will begin.

CROSSFADER ASSIGN

Replacing the Crossfader

The Crossfader may be removed without disassembly of DN-X1100 itself.

- 1** Pull out the **Crossfader knob**.
- 2** Removed the five outer screws (A) attaching the crossfader plate.
- 3** Remove the two screws (B) attaching the crossfader bracket assembly from chassis.
- 4** Pull the crossfader bracket assembly forward and unplug the 3P cable from the connector on the panel board.

Replacing the Channel Fader

The Channel fader may be removed without any disassembly of the DN-X1100 itself.

- 1** Pull out the **Channel fader knob**.
- 2** Remove the five outer screws **(A)** attaching the channel fader plate and channel fader bracket assembly from the front panel.
- 3** Remove the two screws **(B)** attaching the channel fader bracket assembly from chassis.
- 4** Pull the channel fader bracket assembly forward and unplug the 4P cable from the connector on the channel fader printing board.
- 5** Install the replacement assembly by reversing above instructions.

Flex Fader Crossfader Slide Torque Adjustment Procedure

- 1** Follow the procedure at “Replacing the Crossfader” to remove the **Crossfader** from the set.
- 2** Move the lever so that the head of the **Screw** is positioned at the hole in the case.
- 3** Turn the **Screw** using a screwdriver, move the lever and adjust to the desired torque.
- 4** Reinstall the **Crossfader** following the removal procedure in reverse order.
